

Termination of an EMR Cluster

Once you have completed all your coding exercises on your EMR cluster, it is very important that you terminate the cluster. EMR is quite a costly service, and it should be activated only during the time that you are using it.

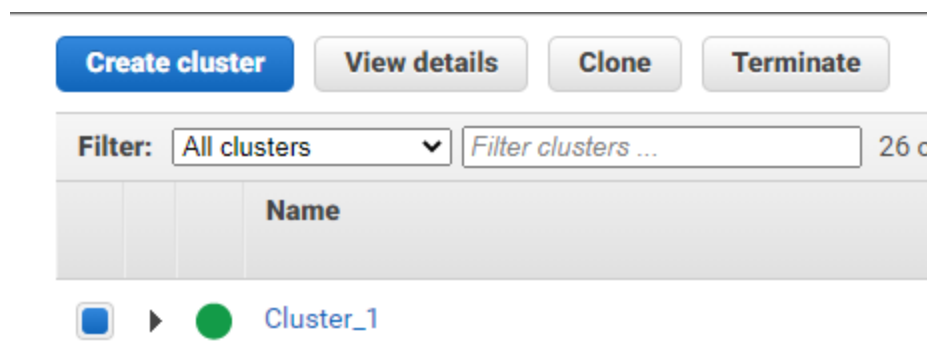

You can easily terminate your EMR cluster by following the steps below:

Step 1: You need to go to the cluster home page, which contains an entire list of all the EMR clusters in your account. You can do this by clicking on the 'Clusters' button to the top left under Amazon EMR.

Amazon EMR

Clusters

Step 2: Next, you need to click the checkbox for your Spark EMR cluster, and then click on the 'Terminate' button.

Step 3: A pop-up will appear, asking you to confirm whether you want to terminate the EMR cluster. Click on the 'Terminate' button in the pop-up. Once you click this button, your Spark EMR cluster will be terminated.
